

SO KIDS CAN BE KIDS.

We're committed to creating safer schools that support students as they learn, play and grow. At nora[®], we know that choosing the right floor has a significant impact on your K-12 facility. That's why we build the following benefits into every square inch of rubber flooring we produce.

- **Durable, resilient** flooring resists damage caused by high-traffic footfall and rolling equipment.
- **Low-maintenance, coating-free** flooring needs little more than tap water for cleaning, keeping your facility free of chemical contaminants that affect students and staff.
- **Reduced life cycle costs** thanks to simplified maintenance, while exceptionally hard-wearing rubber outlasts the average span of facility renovation cycles.
- **Low VOC emission** floor coverings are free of PVC, phthalate plasticizers and halogens. They also contribute to a healthy indoor air.
- **Ergonomic support** reduces strain on staff while simultaneously providing a slip-resistant surface for high-activity student areas such as gyms, hallways and auditoriums.
- **Acoustic control** reduces footfall noise and echoes for a less disruptive learning environment.

“nora provides a comfortable, low-maintenance and long-lasting solution that will be here long after we're gone. That's why we chose it.”

— Mike Luscher,
director of facilities,
Scott County School District
